

Consultation response TEMPLATE

Please personalise your response. Individual comments written in your own words are much more effective than identical submissions.

1

You MUST specify either the data campus, or battery storage in your writing. They have separate emails, and soon to be separate planning applications.

Subject: Xlinks Devon Data Campus/Battery storage Consultation Response

Dear Xlinks Consultation Team,

I am writing to provide my feedback on the proposed Devon Data Campus and Battery Energy Storage System.

I have concerns about this proposal because I believe it could have a significant impact on North Devon and the local communities surrounding the site.

In particular, I am concerned about:

- The loss of approximately 800 acres of countryside and the impact on the local landscape.
- The potential effects on wildlife, biodiversity and protected habitats.
- Increased traffic and the impact on local roads during both construction and operation.
- Noise, light pollution and the long-term impact on nearby residents.
- The pressure the development could place on local infrastructure and services.
- The scale of the proposed AI data centre and Battery Energy Storage System within a predominantly rural area.

I respectfully ask that these concerns are fully considered as part of the consultation process before any planning application is submitted.

Thank you for taking the time to consider my comments.

Yours faithfully,

Name:
